9.13 DISABLED AIRCRAFT
The pilot or operator of an aircraft shall be responsible for the prompt removal of an aircraft wrecked, disabled, or otherwise abandoned on the Airport. Failure of the operator to comply with this rule will constitute authority for Airport management to have the aircraft removed at the operator’s expense and without liability for damage which may result in the course of such remove. The Commission reserves the right to disable Emergency Location Transmitter signals emitting from aircraft when located and/or render the electrical and/or fuel systems safe.

9.14 HAZARDOUS AIRCRAFT OPERATIONS

9.16.1 No person or company shall repair, maintain, service, or test its aircraft or aircraft of others in any public areas of the Airport without a valid permit or lease from the Commission authorizing the repair, maintenance, conditioning, servicing or testing of aircraft.

Any person, firm, or corporation basing an aircraft on the airport may be granted the right to perform services including, but not limited to, maintenance, repair, and fueling, on its own aircraft with its own employees. Aircraft owners may be permitted to fuel, wash, repair, and otherwise take care of their own aircraft with their own personnel, equipment, and supplies.

An aircraft owner or operator, including but not limited to individuals, air carriers, air taxis, corporate flight departments, charter operators, or flight schools may:

b. Use its own sources for parts and supplies.
c. Perform its own self-fueling activities, including bringing fuel to the airport with its own employees in conformance with these rules and regulations pertaining to self-service operations.

9.16.2 Contracting to a Third Party
Self-service activities must be performed by the owner or employees of the entity involved. Self-service activities cannot be contracted out to a third party. To confirm that particular individuals performing tasks on aircraft are employees of the individual or company conducting the self-service activity, the Commission may request clarifying information, such as payroll data.

9.16.3 Restricted Service Activities
The Commission may require an aircraft owner or operator to:

a. Observe reasonable rules and regulations pertaining to self-service operations, including local fire safety and federal and/or state environmental requirements.

b. Confine aircraft maintenance and fueling operations to appropriate locations using equipment appropriate for the job being done.

c. Limit equipment, personnel, or practices that are unsafe, unsightly, or detrimental to the public welfare or that would affect the efficient use of airport facilities by others.

d. Pay the same fuel flowage fees that the Commission charges providers selling fuel to the public.

The Commission has developed these rules and regulations to ensure safe operations, preservation of facilities, and the protection of the public interest. These rules and regulations include:

a. Confining the use of paints, dopes, and thinners to structures that meet appropriate safety and environmental criteria.

b. Establishing safe practices for storing and transportation fuel.

c. Restricting hangars to related aeronautical activities.

d. Placing restrictions on the use of solvents to protect sewage and draining facilities.

g. Maintaining minimum requirements for taxiing an aircraft, i.e., student pilot, rated pilot or Airframe and Power Plant (A&P) mechanic.

h. Setting requirements for escorting passengers and controlling vehicular access.

i. Requiring certain regulations that mirror FAA regulations in Title 14. For example, requiring a pilot license or medical certificate as a condition for self-servicing aircraft is inconsistent with 14 CFR Part 61 (i.e. an owner is not required to be a licensed pilot or to hold a medical certificate). The aircraft pilot or operator would have to meet FAA licensing requirements. The aircraft owner must simply own the aircraft to self-service it.

9.16.5 Restrictions Based on Safety and Location

The Commission will not permit aircraft owners to introduce onto the airport any equipment, personnel, or practices that would be unsafe, unsightly, or detrimental to the public welfare or that would affect the efficient use of airport facilities by others. Aircraft owners that are subtenants of an airport-tenant, such as an FBO, may not conduct self-fueling or maintenance on the tenant or FBO premises without the approval of the Commission and FBO. However, the subtenant may be directed by the Commission to an alternative location on the airport to self-fuel.

9.16.6 Activities Not Classified as Self-Service

Activities not classified as self-service include servicing aircraft and parts for others, providing parts and supplies to others, receiving services and supplies from fuel cooperative organizations (CO-OPs), and delivery of fuel to owners or operators by off-airport suppliers.
9.16.7 **Commission Self-Service Prerogatives**

Where an owner or operator does not have the equipment or personnel to meet the Commission’s self-service requirements, the Commission may deny the owner or operator the opportunity to perform the specific self-service activity.

9.16.8 **Fractional Aircraft Ownership Program**

a. **Summary**

   Title 14 CFR Part 91, subpart K, provides the regulatory definitions and safety standards for fractional ownership programs. This regulation defines the program and program elements, allocates operational control responsibilities and authority to the owners and program manager, and provides operational and maintenance safety requirements for fractional ownership programs. (Additional requirements can be found in Part 91, subpart F.)

b. **Fractional Ownership**

   Companies engaged in fractional ownership operations under Part 91, subpart K, will be considered to be aircraft owners for purposes of the self-service provisions of Grant Assurance 22(f), Economic Nondiscrimination, and entitled to self-fuel fractionally-owned aircraft.

9.17 **SELF-FUELING**

A permit must be obtained by an aircraft owner or tenant flight school to engage in self-fueling of their aircraft. Self-fueling requirements are included in the Minimum Standards for Fixed Based Operators and Specialized Aviation Service Operators which are made part of these rules and regulations by reference.

10.4 FLAMMABLE MATERIAL
No person shall store flammable material or equipment, use flammable liquids or gases, or maintain his premises in such a condition as to violate the State of Tennessee codes or any rules herein contained. Flammable liquids having a flash point below 110 degrees Fahrenheit shall at all times be kept in and used from approved safety cans and stored in acceptable metal cabinets, in quantity not to exceed 25 gallons. Transfer of flammable liquids from original containers to safety cans shall be done outside of buildings in a safe location. Areas surrounding storage or flammable material shall be kept clear of all flammable and combustible material.

10.5 EXTINGUISHERS
Tenants of all hangars and buildings shall provide suitable fire extinguishers and equipment which shall be kept in good working order as determined by the Chief of Public Safety or his designated representative and not tampered with or used for any purpose other than fire fighting or fire prevention. The Commission reserves the right to establish standards for the type, use, and location for any storage tank or container proposed for use on the Airport. This right includes the ability to approve any tanks used for the transport of products on the Airport.

11.2 With respect to any aboveground storage tank owned or operated by tenant for the storage or distribution of any hazardous material, tenant will comply at all times during the term of the Lease with all environmental laws and limit use thereof to the Permitted Business Use. All certificates, licenses, permits and/or registrations for installation and operation of such tank must be obtained prior the installation or use of said tank.
50.0 TENANT ACTIVITIES

50.1 AUTHORIZED CONSTRUCTION
No buildings, structures, tie downs, ramps, paving, taxi areas, or any other improvement or addition shall be placed or constructed on the Airport, or existing amenity altered or removed without prior approval of the Commission. In the event of any authorized construction, the Commission may, at its discretion, require an appropriate bond to guarantee the completion of the construction in accordance with its approval. The Commission shall consider conformance to the capital improvement plan for the Airport and Airport Master Plan prior to the approval or denial of any construction or development at the Airport.

50.2 COMMISSION OBLIGATIONS
Nothing contained in these rules and regulations shall be construed as requiring the Commission to maintain, repair, restore, or replace any structure, improvement or facility which is substantially damaged or destroyed due to an Act of God or other condition or circumstance beyond the control of the Commission. The Commission will not held liable for damage to personal or private property of tenants or visitors that may result from an Act of God.

Persons holding leases, permits or operating agreements with the Commission shall also have their contract privileges terminated for such violations. Furthermore, such person(s) shall be regarded as a trespasser upon Airport property, and subject to arrest under the laws of Sullivan County and the State of Tennessee.

The application will be considered for approval by the Commission, and if in order, a permit will be issued or an agreement will be executed. Fees due the Commission will be determined by the nature of the commercial activity. Completion of application for permit will be required to conduct business for special events either on the airfield or for use of the terminal facilities. The applicant will be required to provide proof of liability insurance coverage in the amounts determined by the Commission to sufficiently meet the risk assessment for the activity.
53.0 DENIAL AND TERMINATION OF PERMITS

A permit may be denied, orally or in writing, by the Executive Director, upon the following grounds:

53.1 Failure to Meet Conditions - The application proposes activities contrary to the limitations and conditions specified in these regulations, or contrary to any applicable law, or if application is incomplete.

53.2 Dangerous Activity or Location - It reasonably appears to the Executive Director that the proposed activity will present a danger to public safety or health, will inconvenience Airport users, or will unduly interfere with normal Airport operations and functioning.

53.3 Incompatible Use - The proposed activity is of such a nature or duration that it cannot reasonably be accommodated in the particular area applied for; would be inconsistent or incompatible with the purpose(s) for which the area sought to be reserved is normally reserved, or with other uses of the Airport.

53.4 Violation of Conditions Under Previous Permit - The person, organization or entity applying for a permit has received a permit at any time during the past ten (10) years, and failed to comply with any of the Rules and Regulations contained herein, or any conditions or limitations in force or agreed to at the time.

53.5 Receipt of Multiple Requests - A fully executed prior application for the same time and place has been received, and a permit has been or will be granted authorizing activities which do not reasonably permit multiple occupancy of the particular area. Under these circumstances an alternate time will be proposed by the Executive Director to the applicant, if a suitable alternative time is available; or the applicant may be placed on a waiting list for the next available time.

53.6 No Responsible Person or Entity - There is no person or entity authorized to sign an application on behalf of a group applying for a permit and/or there is no person or legal entity willing to accept responsibility for the group’s adherence to the limitations and conditions of a permit.

53.7 Review of Denied Permit

Should any applicant be denied a permit, such action shall be subject to review by the Airport Commission. Any applicant desiring such review shall make a written request to the Commission within ten (10) days from the date written notice of denial of the permit is sent to the applicant. that the request for review is received at least seven (7) days prior to such meeting. The Commission shall mail to the applicant, at the address on the application, written notice of the time and place at which the review will be held, and such notice shall be mailed at least five (5) days in advance of the review date. At the review the applicant may appear, may be represented by counsel, and may present evidence. Upon completion of the review, the Airport Commission shall affirm or reverse the action of the Executive Director, and shall give prompt written notice of the affirmance or reversal to the applicant. Any determination of the Commission adverse to the applicant shall be subject to appeal in accordance with the laws of the State of Tennessee.

53.8 TERMINATION OF PERMIT

The activities referred to herein shall be conducted strictly in conformity with the terms and conditions set forth in the permit issued by the Executive Director. The Executive Director may cancel or suspend the permit, without prior notice, due to an emergency, overcrowded condition, or for security reasons. Each permit issued by the Executive Director shall specify the area or areas in which the applicant’s proposed activities may be conducted.

Any violations of the provisions of this policy or of the certifications made in an application for a permit by any person or organization shall cause the termination of any permit under which they are operating. In addition, a permit may be revoked for any reason for which it could be denied. Upon termination or revocation, the person or organization shall not be eligible to receive a new permit for a period of six (6) months. In the event of such termination or revocation, the Executive Director shall give notice thereof to the holder of the permit, orally or in writing, at the choice of the Executive Director. Upon termination or revocation, the permit holder and all persons present on behalf of the permit holder shall vacate the premises immediately. Any person or organization whose permit shall thus be terminated or revoked may request a hearing thereon before the Airport Commission, provided that such request shall be made in writing and shall be filed with the Airport Commission within ten (10) calendar days of the sending of the notice of termination. When such hearing shall be requested, the same shall be held at the next meeting of the Commission, provided that the request for hearing is received at least five (5) days prior to such meeting. The Commission shall mail to the party who requested the hearing a notice of the time and place where the hearing will be held, and such notice shall be mailed at least five (5) days in advance of the hearing. At the hearing, the party requesting the hearing may appear, may be represented by counsel, and may present evidence. Upon completion of the hearing, the Commission shall affirm, revoke or modify the
